

Ontwerp levensloopbestendige woning **Bouwnummer 22**

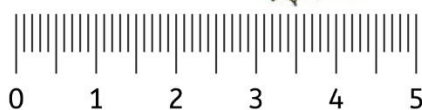

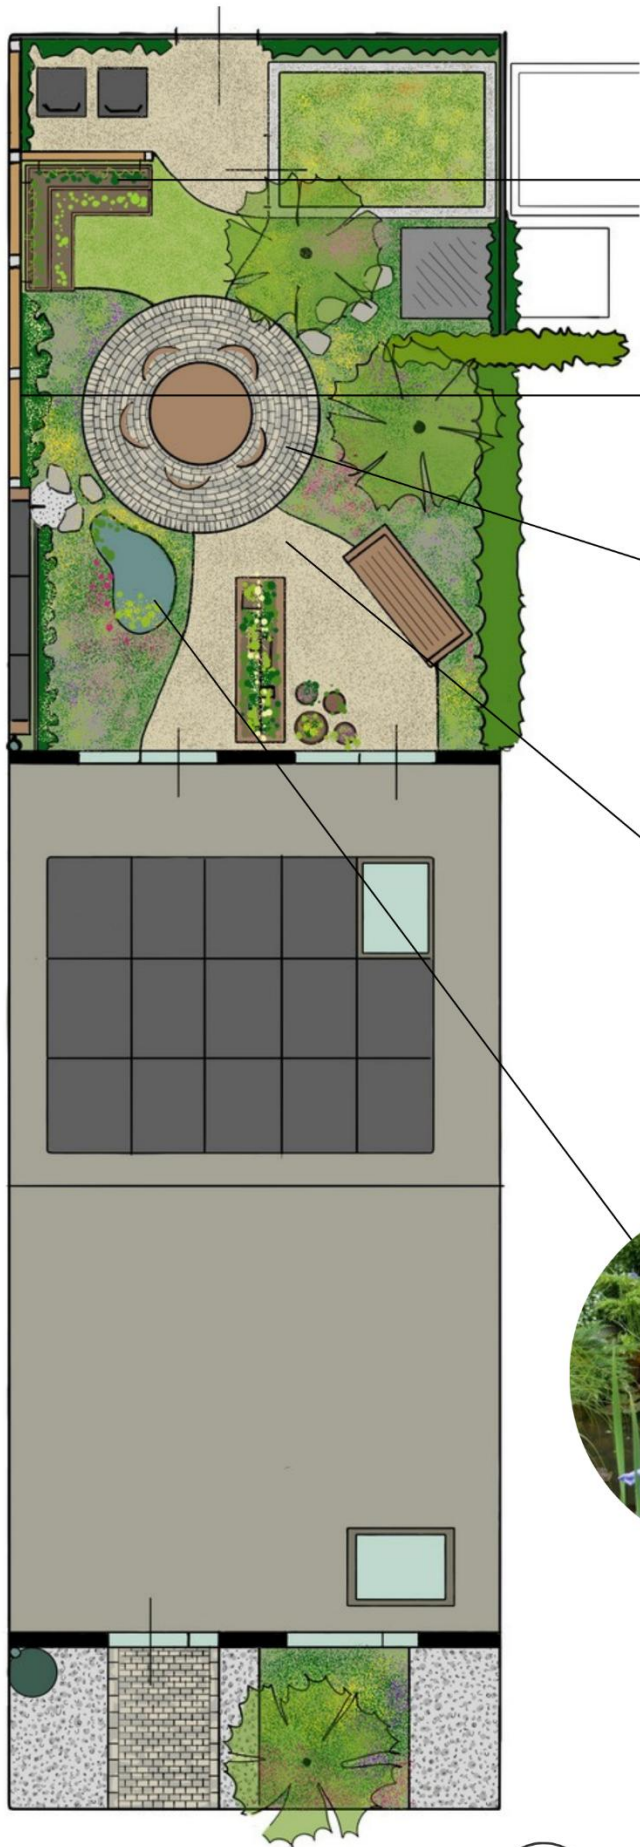

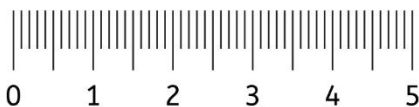

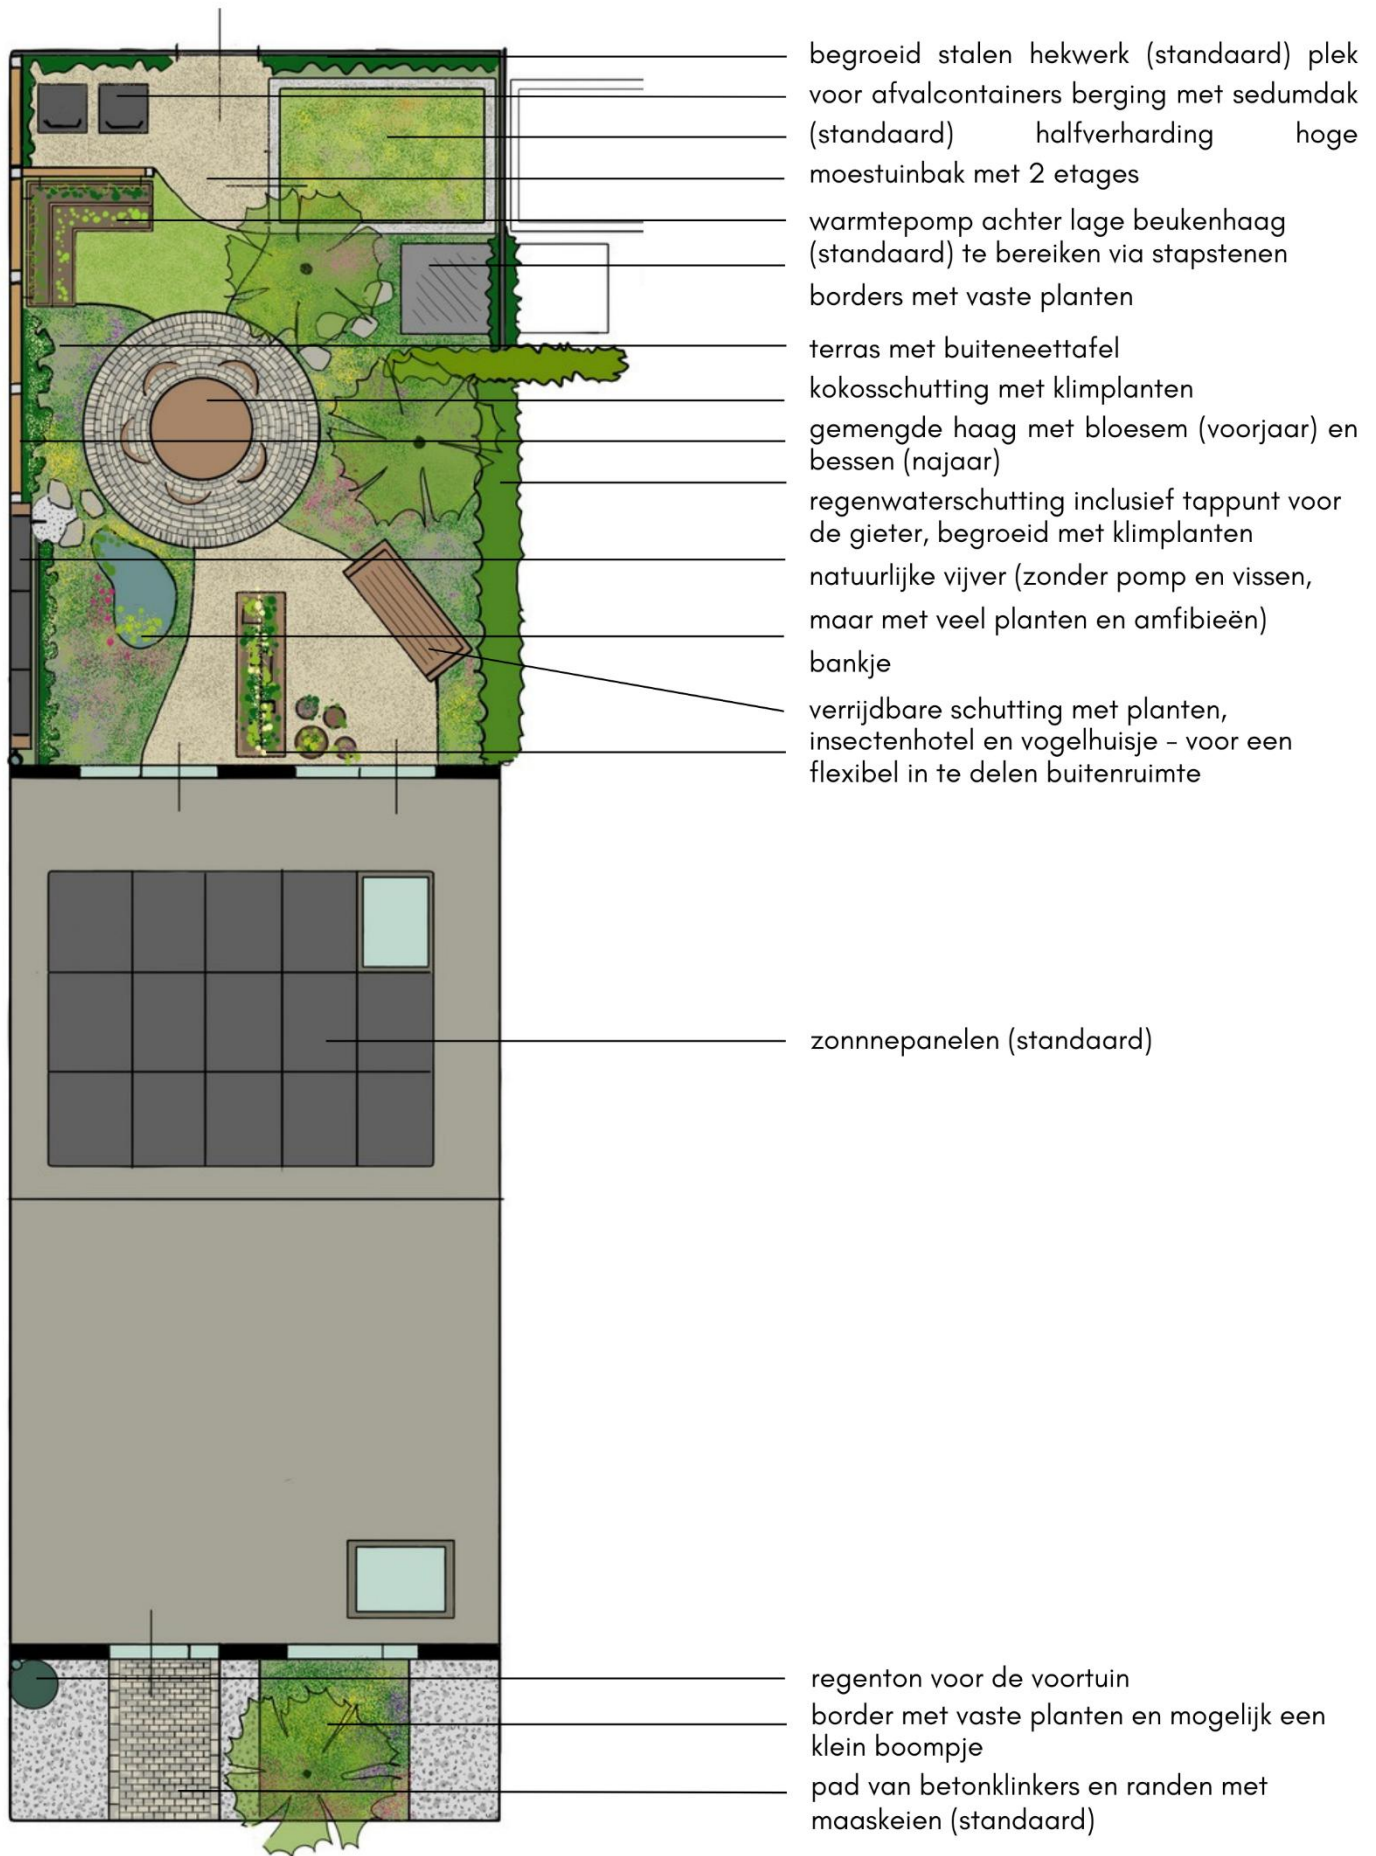

Bij dit type huis is ervoor gekozen om 2 verschillende uitzichten vanuit het huis te creëren. Deze worden gescheiden door de verrijdbare plantenbak die op het terras is geplaatst.

Het is een onderhoudsvriendelijke tuin met verhoogde plantenbakken zodat iedereen er makkelijk bij kan.

Het kokoshek is geluidswerend zodat je heerlijk rustig in de tuin kan zitten.

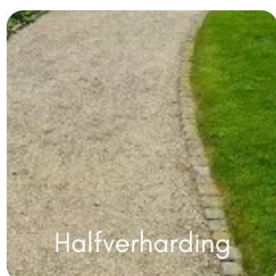

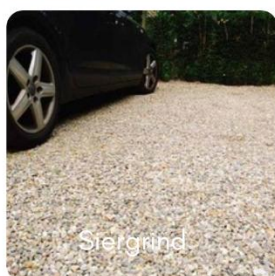

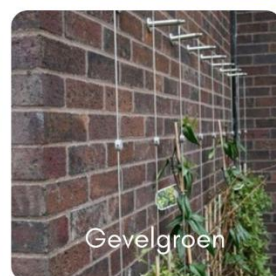

Hieronder vindt je een overzicht van de verschillende materialen en planten die in het ontwerp terugkomen:

Materialen

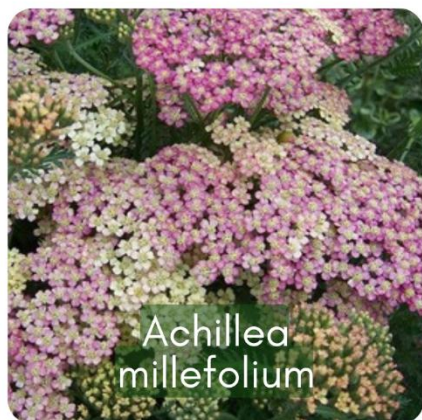

Planten

Hieronder vindt je een overzicht van alle beplanting en
bomen die in deze tuin goed tot hun recht komen:

Vaste planten

Briza media

Campanula
persicifolia

Centaurea scabiosa

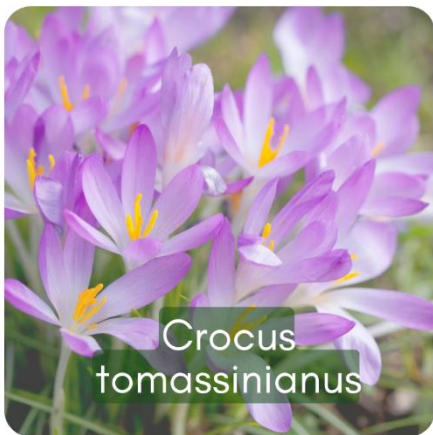

Cerastium
tomentosum

Cichorium intybus

Cirsium rivulare
'atropurpureum'

Crocus
tommassinianus

Cymbalaria
muralis

Dianthus
carthusianorum

Eryngium planum

Foeniculum
vulgare

Fragaria
moschata

Galanthus nivalis

Galium mollugo

Galium odoratum

Geranium pratense

Hylotelephium telephium

Hypericum perforatum

Hyssopus officinalis

Knautia arvensis

Lamium maculatum

Leucanthemum vulgare

Lonicera periclymenum

Malva moschata

Molinia caerulea
'variegata'

Origanum vulgare

Primula veris

Prunella vulgaris

Reseda lutea

Ribes rubrum

Rubus idaeus

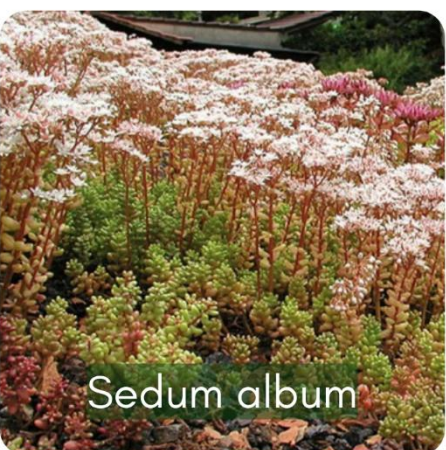

Salvia pratensis

Salvia verticillata

Saponaria
officinalis

Sedum album

Sedum rupestre

Serratula tinctoria

Sesleria autumnalis

Silene dioica

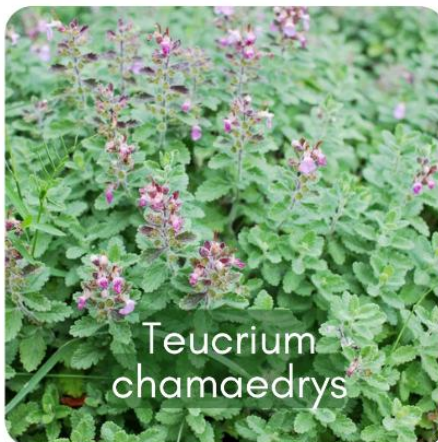

Silene vulgaris

Struthiopteris
spicant

Symphytum
officinale

Teucrium
chamaedrys

Teucrium
scorodonia

Thymus pulegioides

Verbascum nigrum

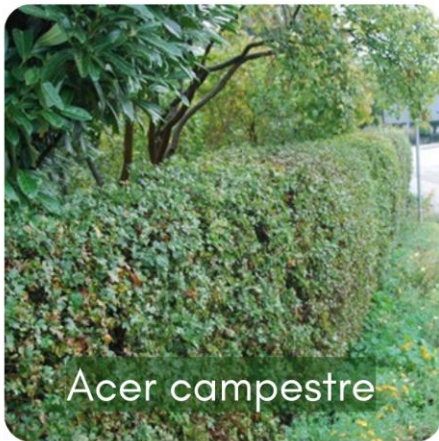

Veronica longifolia

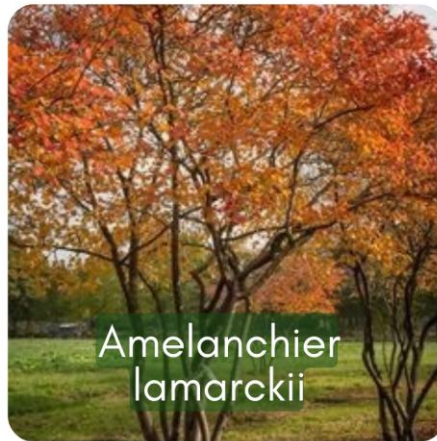

Vinca minor

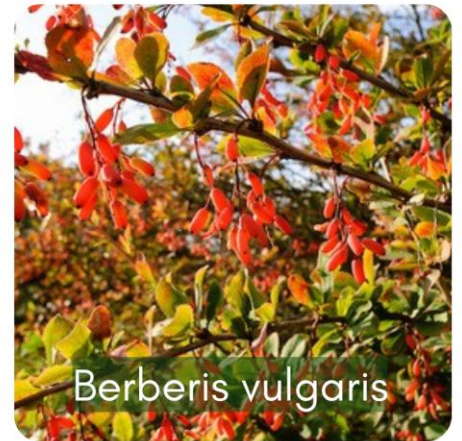

Struiken

Acer campestre

Amelanchier
lamarckii

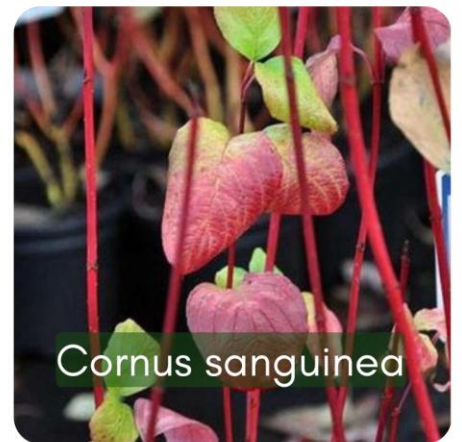

Berberis vulgaris

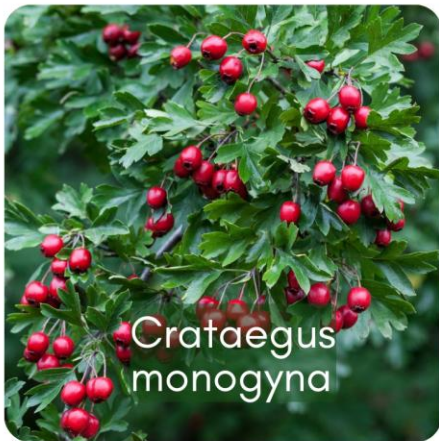

Carpinus betulus

Cornus mas

Cornus sanguinea

Crataegus
monogyna

Euonymus
europaeus

Ligustrum vulgare

Rosa tomentosa

Sambucus nigra

Viburnum opulus

Bomen

Acer campestre

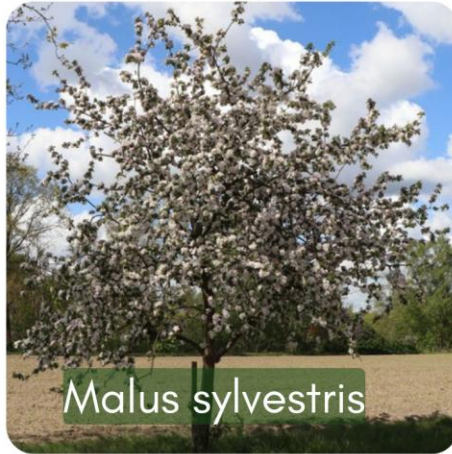

Betula pendula

Castanea sativa

Fraxinus excelsior

Malus sylvestris

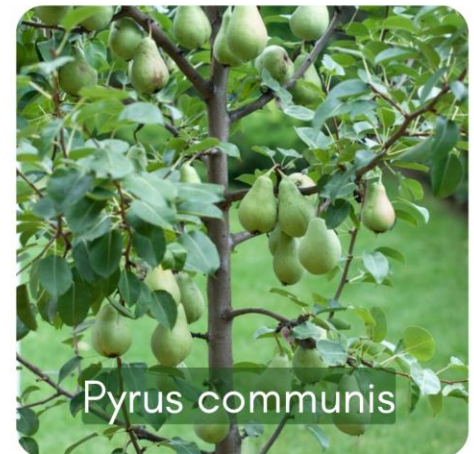

Prunus avium

Prunus cerasifera

Prunus cerasus

Pyrus communis

Salix caprea

Sorbus aucuparia

Tilia cordata
